# A trusted partner for your practice

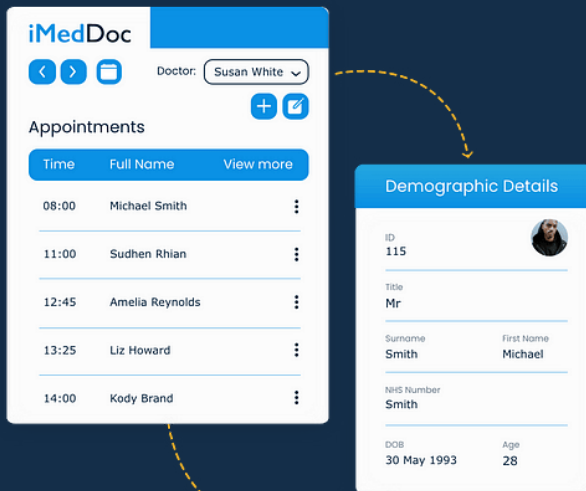

Your practice is complex with many moving parts. Many secondary objectives to your primary goal of providing quality care. iMedDoc allows you to manage every aspect of your practice, securely. We simplify your daily tasks so you can focus on your patients.

We have been building and developing solutions for consultants for 25 years, so believe us when we say we know exactly what you need to run a profitable and successful practice. iMedDoc allows you to manage every aspect of your practice, securely. We simplify your daily tasks so you can focus on your patients.

Built by clinicians for clinicians. Whether you are an established consultant, a large clinic operating across multiple locations or just taking your first step into private practice – iMedDoc is the software solution for you.

# What makes iMedDoc different?

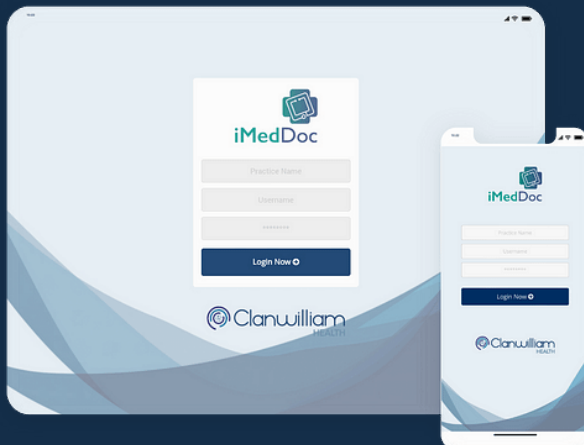

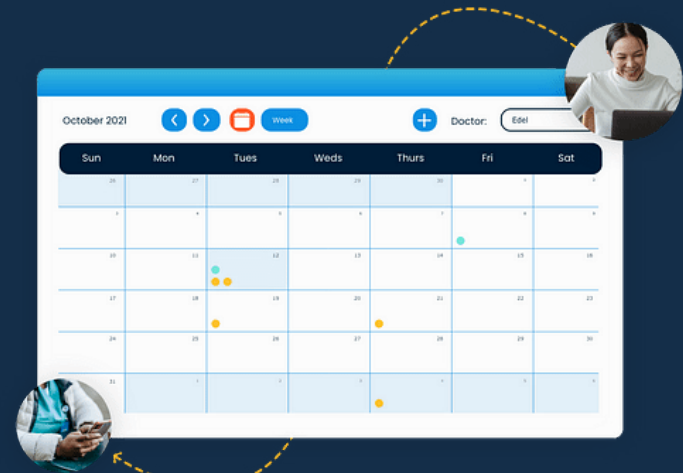

## → Workflows

We have lots of features (and we love them all equally), but it is the way in which they work together which truly makes iMedDoc different. Everything has its place and works as you would expect. When we talk about workflows, we're really talking about saving you time.

## Flexibility ←

Don't let a solution dictate how you work. Our cloud-based system has the flexibility to adapt to your ways of working. Maintain access to your practice from anywhere at any time as long as you have an internet connection.

## → Mobile app

Use our mobile application to access your business from anywhere at any anytime. Available on both android and iOS mobile and tablet devices, our purpose built app will put your practice in the palm of your hand.

# All the features you need in **one place**

Our goal is to help **optimise your workflows** and drive efficiencies across your practice. Saving you and your team time on administrative tasks while automating your medical processes.

## Mobile Application

Your practice in the palm of your hand

## Reporting & Analytics

Build a better business clinically and commercially

## Dynamic Diaries

Plan to perfection with our detailed diaries

## Video Consultation

Empower your patients to book and pay online

## Billing & Payments

Issue invoices and receive payments easily

## Digital Dictation

Built in dictation on desktop and mobile

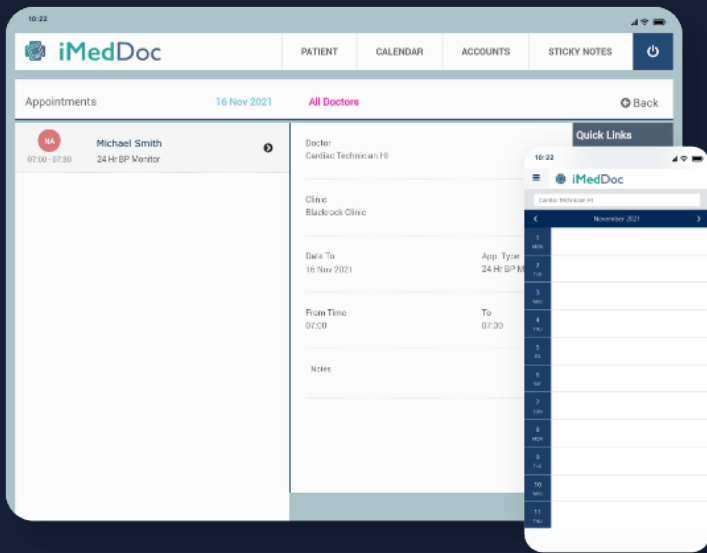

## Medical records

Labs, prescriptions, and medical notes

## Security & Privacy

Top class security giving you peace of mind

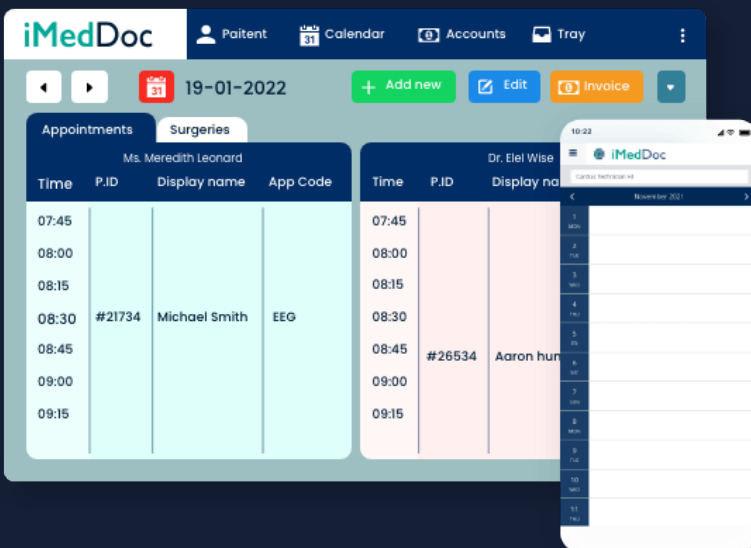

## Mobile Application

Take your practice with you. Our purpose built app gives you anytime, anywhere access to your business.

Through the iMedDoc app you have access to all of the main areas of our desktop version. These areas include patients list, clinic/theatre list, soap notes, medication histories, scanned documents, upload images and dictations. So you always have access to the practice and patients.

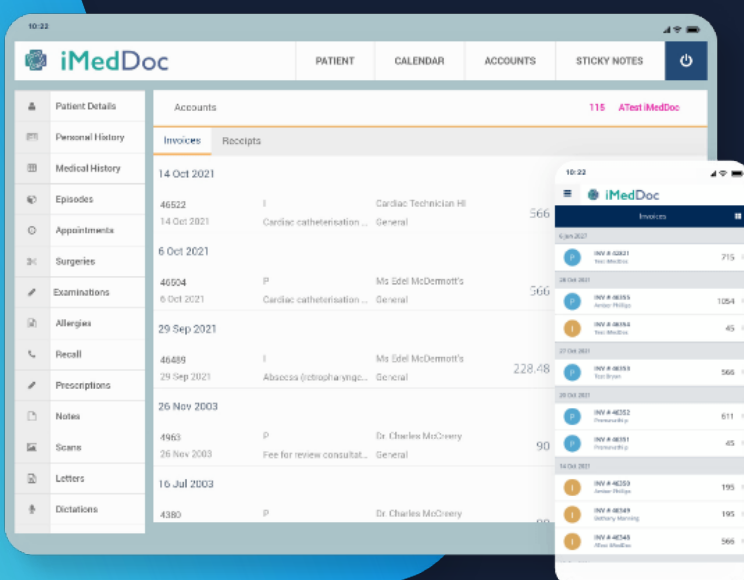

Available on both android and iOS mobile and tablet devices.

## Dynamic Diaries

Our dynamic diaries are extremely flexible allowing you to view multiple diaries side-by-side on the same screen. Meaning you can clearly compare your own diary with that of other consultants or staff within the practice. This is especially useful when coordinating efforts and trying to find appointment availability quickly.

A simple to use yet comprehensive diary system that gives you and your team a clear overview of scheduling across your operation.

## Billing and Payments

Create payments or invoices effortlessly for all your billing needs. Track your unpaid invoices and get paid faster. Our accounting module provides you with rich analytics to significantly reduce your overdue invoices. You can also easily create transaction statements to track a patient's payment history. All the related transaction or payment events are securely logged within iMedDoc, giving you full transparency.

S.No	Report Name	Module Name	Report Type
1	Allergy,Pres,Exam	Patient	Detailed Report
2	Appointment	Patient	Detailed Report
3	Dis,Letter,Inv,Rec	Patient	Detailed Report
4	DNA	Patient	Detailed Report
5	History	Patient	Detailed Report
6	Notes	Patient	Detailed Report
7	Prescription	Prescription	Group Report
8	Prescription Report	Patient	Group Report
9	Recall Report	Patient	Detailed Report
10	Recall,Scan,Pat,Not	Patient	Detailed Report

## Reporting & Analytics

iMedDoc's reporting functionality unlocks valuable insights for your business. Not only can you track financial performance through our accounting module but you can also use the report builder to clearly access and interpret medical records across your patient population. Search and view by a wide range of demographics including treatments received.

## Video Consultation

iMedDoc allows you to virtually see and consult with your patients online. Using our in-house purpose built video consultation platform, we are making healthcare visits more accessible for everyone. All you and your patient will need is access to the internet and virtually any device, ranging from a PC or Mac to a mobile device or tablet. Once you make a video consultation booking with in the system your patient will receive an automated confirmation email with a link to their appointment.

## Digital Dictation

iMedDoc gives consultants the flexibility to dictate letters and patient notes how they choose. Use our mobile application to dictate on the go and upload for transcription. Streamline the transcription workflow, create efficiencies and work remotely from anywhere. Give you and your team time to focus on the running of a busy practice.

In partnership with our sister business, Dictate IT we offer the most advanced dictation technology which has unrivalled accuracy rates of 98%+.

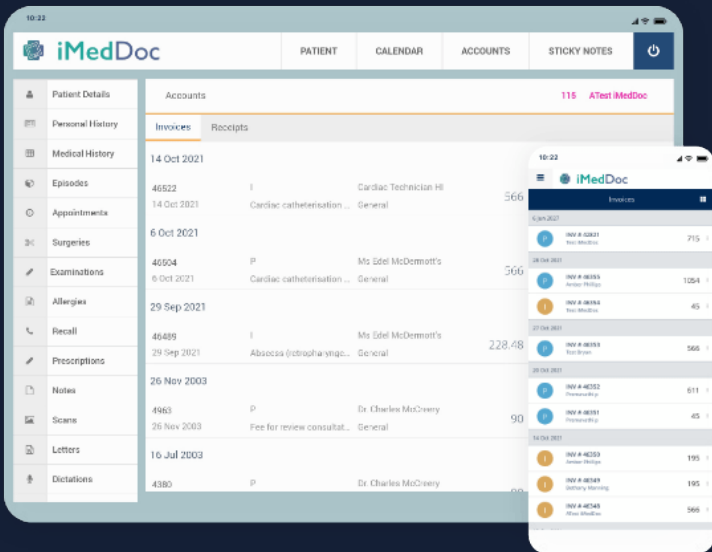

## Medical records

At the core of our system, is the electronic medical record. Our EMR is a cloud-based practice management solution which offers everything that would be required within a practice setting. Our easy to use and highly accessible system will help maximise efficiencies across your practice, ensure data accuracy and save you and your team valuable time.

We've built an integrated and customisable system, which takes care of patient scheduling, patient record management, patient account & claim management with the highest standard of data security.

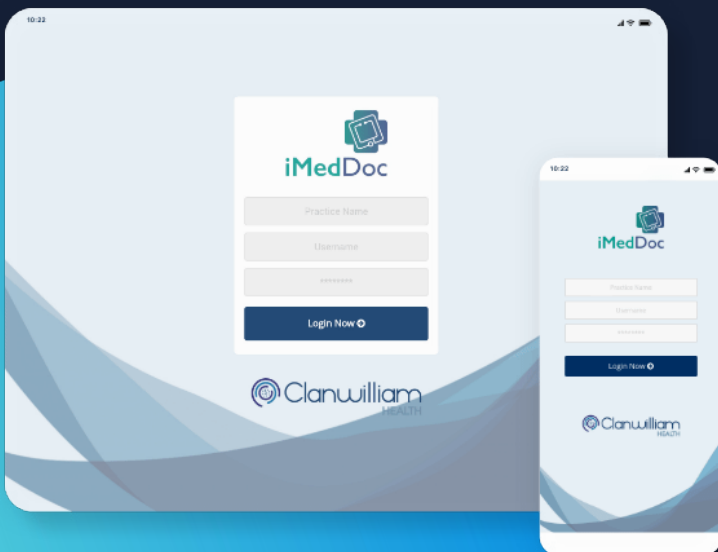

## Security & Privacy

Saving your data in a cloud-based system is safer than storing it on a desktop where information might be scattered across several databases. Through our partnership with Amazon Web Services (AWS), iMedDoc stores all patient and practice data in highly secure data centres.

By using our system, practices no longer need to worry about storing confidential patient information. Instead they can rely on our expertise to protect data on a centralised server. Physicians can monitor who has access to certain information. iMedDoc is also fully GDPR compliant.

# See what our customers say...

**Mr. Ashley Poynton**  
Spinal Orthopaedic Surgeon

I've used iMedDoc since 2015 and it has been a **great asset** to the development of both my practises - The Poynton SpineCare Institute and Spince Excellence. The system has helped to make the **day-to-day operations much more manageable** for myself and my MDT team and increased efficiencies for patients and team alike. I would definately recommend iMedDoc to a colleague.

**Mr. Subhasish Sengupta**  
Consultant Gastroenterologist

I've been using iMedDoc for nearly **10 years** and in that time I have been thoroughly impressed with every aspect of the platform. The support has always been brilliant, and the actual functionality is great. I couldn't ask for more!
