

ALVICA MEDICAL

A boutique medtech distributor introducing global medical technology innovations to the United Kingdom. You may know us as a sponsor of the new LIPS Clinic opening in Battersea, where we showcased two devices offering an avante-garde approach to back pain & joint rehabilitation:

reLounge

reLounge significantly **alleviates back pain** with a single 20-minute session, **evaluating muscular & myofascial strain or imbalances**, before targeting these with tailored Dynamic Deep Wave Stimulation of **paraspinal muscles, nerves & acupressure points**.

- Clinically effective combination of **TENS, EMS, Heat Therapy & Massage Therapy** unique to reLounge.
- Immensely popular with patients & clinicians in Europe and the US.
- Lucrative ROI for private clinics.

Applications: Spinal, Rheumatology, Pain management, Medicine, Physiotherapy, Muscle Strengthening.

Try reLounge yourself at: Alvica Medical in the Royal Exchange, or Visit Health, West Kensington.

rebleSS

rebleSS is a **robotic rehabilitation device** that combines Passive, Active-Assisted & Resistive modes to progressively restore strength & range-of-motion **across four joints and ten positions, with one device**.

The **rebleSS clinic** portal enables remote patient and carer **engagement, exercise prescription & progress data** visualisation, making RebleSS suitable for a range of rehabilitative use-cases & settings:

- **In-Patient:** Trauma & Acute Neuro-Rehabilitation (incl. ABI, SCI & Stroke)
- **At-Home:** Above + Elective Orthopaedic & NeuroProgressive Physiotherapy
- **Four in One:** Elbow, Wrist, Knee & Ankle

We are keen to partner with private & public healthcare on further Trials & Clinical Study, and welcome any clinical or patient referrals
