EXPERT DECISION SUPPORT

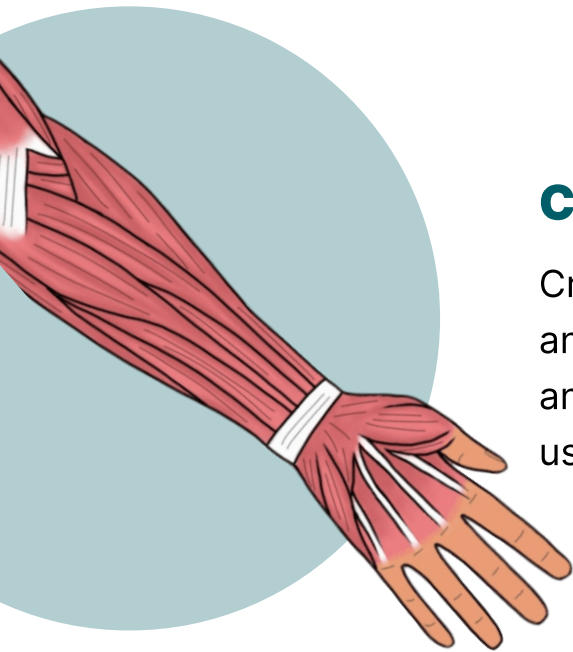

CrossCover is a unique web app which helps guide frontline healthcare staff through difficult clinical decisions they have to make everyday.

Independent of their qualifications and level, all healthcare staff are enabled to make decisions as if an Orthopaedic consultant was advising them every step of the way.

GET IT RIGHT EVERY TIME

CrossCover is a step-by-step guide which breaks down complex decision-making processes into easily manageable portions.

This helps healthcare professionals arrive at the correct diagnosis and management plan more easily and standardises care to adhere to current best practice.

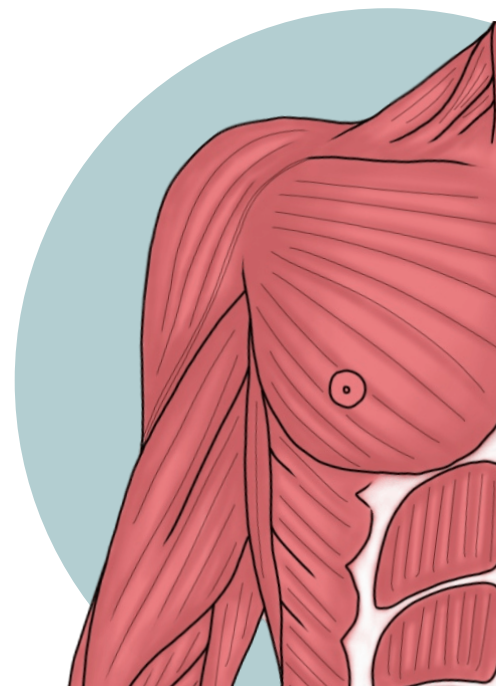

COMPLETELY EDITABLE

CrossCover decision support is based on both national and local guidelines. On top of that, it is fully editable and customisable to help make it as relevant to the users as possible.

ACCESSIBLE

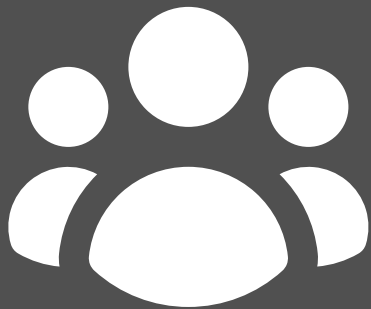

CrossCover can be accessed via any device with an internet connection. This allows great flexibility and helps reduce any delay to the patient care.

The app summarises key decision points allowing for smooth handover and help with documentation.

FOR PRIMARY CARE

Reduce clinic appointment times as your local expert consultant-led decision support pathways are readily available for all your musculoskeletal presentations.

FOR PATIENTS

Through directing patients to the right clinic at the right time it can reduce total number of clinic attendances, reduce unnecessary investigations and treatments.

FOR SECONDARY CARE

Increase the quality and relevance of referrals to secondary care to help tackle the elective backlog.

FOR THE INTEGRATED CARE SYSTEM

Save resources through streamlining clinic appointments in Primary and Secondary care, Help the NHS to achieve its NetZero target by reducing patient care miles.
