## NEW UniReliever™

Comfortable & Effective  
Offloading Knee Brace

The UniReliever™ builds upon decades of patient and clinician experience and has been designed for optimal comfort.

UniReliever™ allows natural movement<sup>(1)</sup> of the knee and optimal offloading when needed for moderate to severe unicompartmental OA.

### Key Features

- 3 point leverage system, which offloads the medial or lateral compartment
- Clinically proven<sup>(2)</sup> pull strapping system offers tension and offloading when needed for the individual patient's gait
- Unique consolidated strapping system, which allows even disbursement of load at the point of application, avoiding the popliteal area
- UniReliever™ offers targeted relief when needed
- Flexible semi-rigid femoral and tibial shells, allowing easier contouring, for an intimate fit
- Anti-migration padding with non-slip silicone webbing, reducing pressure points and slippage
- Integrated dial offers tool free offloading, allowing patients to control their pain
- TM5 hinge for range of motion control
- UniReliever™ and its components can be cleaned with plain water and a mild anti-bacterial soap

### Sizing

- Universal sizing, reducing inventory management

*fitting video*

# UniReliever™

**Recommended for** conditions requiring moderate to severe osteoarthritis unicompartmental offloading, meniscal cartilage repair, avascular necrosis, varus and valgus instability

## Patient Testimonial<sup>(3)</sup>

"Fit and function were fantastic and the offloading relief was spot on"

## Surgeon Testimonial<sup>(4)</sup>

"I've found UniReliever™'s strapping and buckles to be very patient friendly"

**The brace you order is determined by the leg and affected knee compartment.**

- UniReliever OA Knee Brace Left Medial/Right Lateral  
**Part # U3090129900351**
- UniReliever OA Knee Brace Right Medial/Left Lateral  
**Part # U3090129900352**

Flexible cuffs adapt to most patient morphology

Easy buckle system for quick donning and doffing
