

AIRCAST®

ActyFoot™

TAKE CONTROL OF STABILITY

DJO® IS NOW **enovis™**

AIRCAST®

For more than 30 years, healthcare professionals around the world have trusted Aircast® to provide technological breakthroughs in patient care. Utilizing patented technology supported by biomechanical testing, each Aircast product is developed using the concept of “functional management.” The results are orthopaedic appliances that not only address injuries, but also allow patients to maintain a degree of activity in their daily lives.

Now, following in the footsteps of recognized names such as the AirSelect™ pneumatic walker boot and the Air-Stirrup® ankle brace, Aircast introduces its latest product offering.

ActyFoot™

TAKE CONTROL OF STABILITY.

The ActyFoot™ ankle support's modular design allows the user to control the level of ankle stability as required.

Its removable lateral stay offers increased immobilization and protection to aid recovery following injury or for added confidence during activity.

Without the stay, the unique strap system provides sufficient support for sports and daily activities while allowing greater freedom of movement.

Intended use/Indications

ActyFoot is designed to provide support, stabilization and partial immobilization (restriction of movement) of the ankle

- Acute lateral ligament injuries
- Acute ankle sprains and ligament ruptures
- Prevention of further injuries in pre-operative chronic ankle instability
- Protection of ankle joint
- Functional rehabilitation of ankle injury

Features and Benefits

MODULAR DESIGN

- Detachable lateral stay allows the brace to be modified for use in both acute and chronic injury phases

REMOVABLE SEMI-RIGID LATERAL STAY

- Helps provide additional support and protection by limiting ankle inversion (lateral twisting)

ACCESSIBLE DESIGN

- Can be fully opened to allow simple and secure application

FOREFOOT STRAP

- Allows the wearer to adjust the level of compression as required

CALF STRAP

- Adjustable strap with elastic and non-elastic sections provides additional stability to the ankle joint

CROSS STRAP

- Non-elastic diagonal strap further helps to stabilize the ankle and prevent supination of the foot

SEMI-RIGID FOOT PLATE

- Enhances ankle control without limiting plantar or dorsiflexion

FITTING SYMBOLS

- The symbols on the straps guide the user and facilitate application of the brace

LIGHTWEIGHT, ERGONOMIC

- Anatomically shaped using light materials to help avoid pressure points and provide greater comfort

SLIMLINE DESIGN

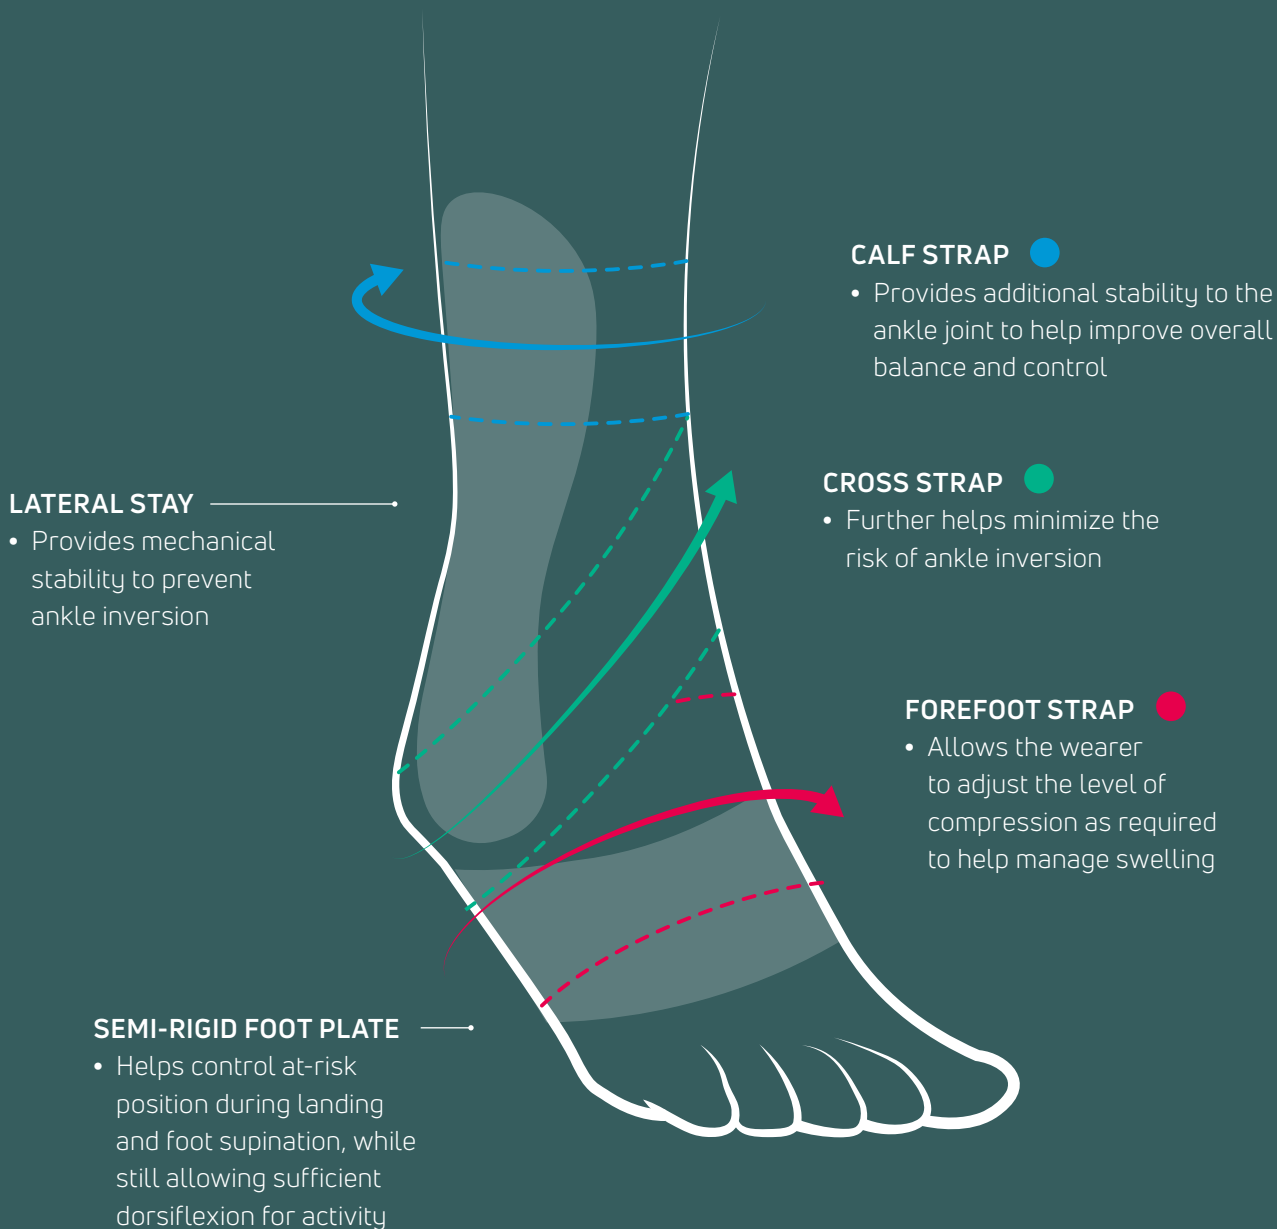

- Fits in most traditional athletic shoes or sneakers and can be worn over a sock for additional comfort
- Low profile, thin straps, and durable materials offer a comfortable fit

How it works

Three integrated straps provide proprioceptive feedback and work together with semi-rigid elements to stabilize the ankle and restrict excessive range of movement.

ORDERING INFORMATION

PART NUMBER		HEEL CIRCUMFERENCE*	EU SHOE SIZE	SIZE
LEFT	RIGHT			
82-02A-SL	82-02A-SR	≤ 30 cm	≤ 38	Small
82-02A-ML	82-02A-MR	30 – 34 cm	38-43	Medium
82-02A-LL	82-02A-LR	≥ 34 cm	≥ 43	Large
