## President's Message

Welcome

Welcome to Liverpool, a capital of culture, home of the Beatles and Eurovision, home to our forefathers, the pioneers of orthopaedics and trauma surgery. From Hugh Owen Thomas to George Bentley via Robert Jones, amongst other things, Surgeon General for the Manchester/Liverpool Ship Canal and Reginald Watson Jones. Change and progress happen here.

Welcome to Congress, the pinnacle of the BOA year. A time and a place to engage with friends and colleagues both surgical and non-surgical. To discuss and critique what is new and what is old and if necessary discard some ideas to the bin of what we used to do. To be sustainable we need systems that are robust yet flexible, systems that sustain recruitment and retention, that value education and training, that thrive on good clinical practice and that are helpful to and indeed protective of our environment.

So this Congress is an SOS call for **Sustainable Orthopaedic Systems** with that theme running through many of our sessions. Come listen to the debate on this House Believes..., pop into the Product Theatre and the Thought Leadership sessions, support our ATOCPC colleagues and the BOMSA contingent too. What new ideas can you take home with you?

Let's bring about some **Sustainable System** change – we can do it, by planting the seeds of change, nurturing the green shoots as a new plan develops, and supporting the sapling as it grows in to a supportive offspring of the Tree of Andry. And if you do want change – please join us at the AGM and have your say.

Please enjoy Congress and if I fail to say hello to you, please say hi to me.

Professor Deborah Eastwood, BOA President
